

# Digital African American History

...

Anna Newman - May 10, 2016 - LIS 458

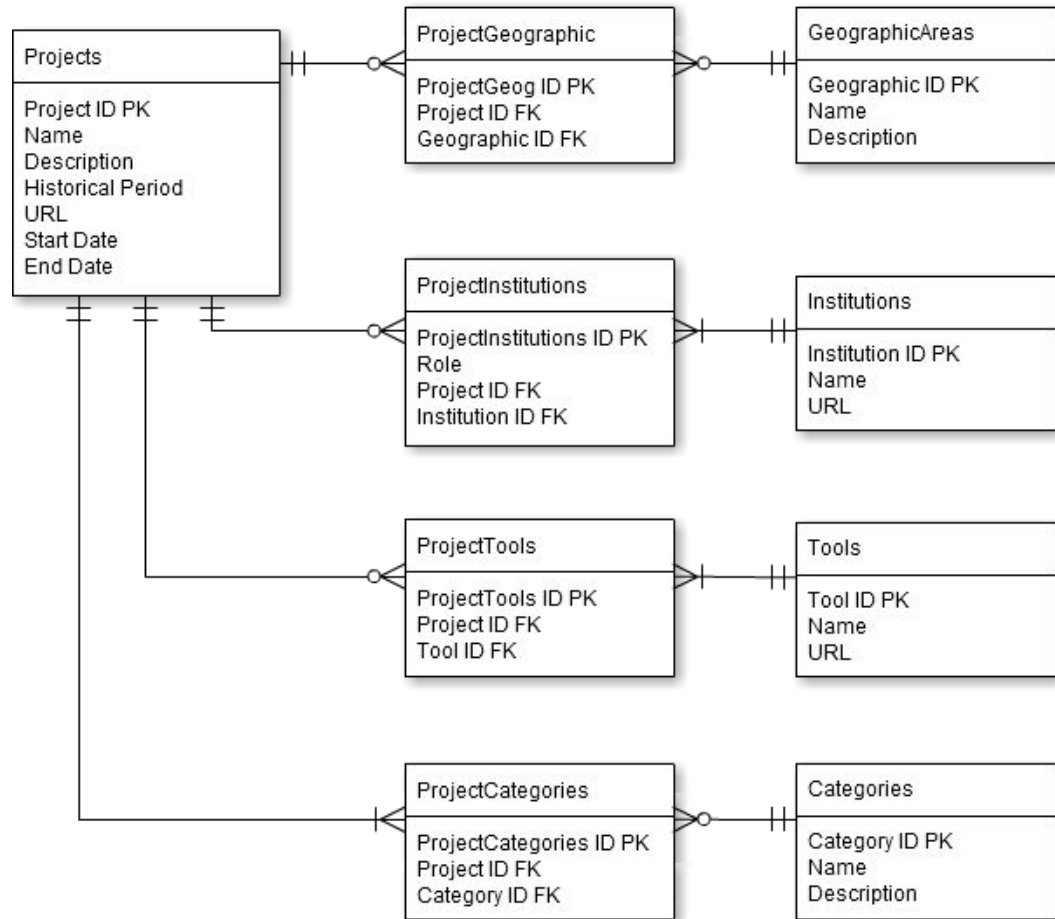

# Mission Statement

The purpose of the Digital African American History database is to store data about digital humanities projects that focus on African American history and support communication in the digital humanities community around ongoing and completed projects.

# Objectives

- Maintain a comprehensive list of digital African American history projects
- Track digital African American history projects that focus on specific geographic areas
- Track funding sources for digital humanities projects in African American history
- Track institutions that sponsor digital humanities projects in African American history
- Produce a list of tools and technologies used for digital humanities projects
